"... we gotta give props to a performer like this who can put a sonic twist on a classic form of music... his tight band would add a refreshing dimension to any blues fest line-up"

- MUSIC CONNECTION

"Adapting electric blues guitar technique to viola, Ross rocks his way through 11 tunes with a sound all his own. Fine performances all around..."

Blues Access #42
re: Driven By the Blues

"Strong string work from the guitarists and the hot bow and fretting of Ross characterize the tunes here. The viola fits like a glove interplaying with each guitar and keyboard line. Not overbearing, the classical string sound fits a groove that gets close to rock....reminiscent of Chicago, guitar-led blues."

Mark A. Cole Big City Blues
April/May 2000

"... a **powerful package** that drives the music consistently at a fast pace."

"Using wah-wah and slide techniques, **the leader moves gracefully through each tune.**"

"Ross trades off with guitarist John Goux...Both provide **expressive solo interludes to wow any audience...**"

"Jimbo Ross and his band unleash that power through their **exciting musical conversations.**"
